

Webmaster's report 2016

The branch website, as in recent years, has had articles on each of the practices we have had during the year and it is good to see it is read by some, and has helped us to attract a small number of new recruits over the last year. As ever, if you visit another tower whilst on holiday etc please do send me details as it adds life and interest to the website.

Whilst technically not website related, the web server is also now providing a means of sending emails from branch officers to all members for whom we have an email address. This is a relatively new feature which I've added, but does mean that messages can be sent out when Kathryn is not available (or her computer is being mended!). We have 32 members on the list at present, but if anyone is not receiving branch messages by email and would like to then please let me have your email address.
