

Website Officer Report February 2024

The Bicester Branch website is now hosted on the Oxford Diocesan Guild's web server, thanks to the hard work of Ricahrd Stanworth, the Guild's Server Manager.

In the last year more than 30 posts were added to the website. The majority are reports of Branch Practices, with additional items regarding Quarter Peals, training achievements and social events.

Pages and posts were visited in excess of 2,100 times.

The email addresses of tower management contacts are updated from time to time, again with the assistance of Richard Stanworth. This process ensures that when site visitors click the contact links for towers, their messages are routed to the personal email address of the appropriate tower manager.

There are currently 60 members of the Branch Members mailing list. The mailing list platform is somewhat antiquated and we are investigating migrating to a more up-to-date system.
